

# Water Purifier Active BIO

Neutral Water / Abundant Hydrogen

Hydrogen Concentration  
1.0 mg/L (Maximum)

Excellent anti-oxidation effect

Benefits of the hydrogen for health  
is reported in Nature Medicine.  
(May 7, 2007 A total of 7 pages)

The outstanding water-purifying  
performance

# H<sub>2</sub>

Big Active Carbon Block Filter

## Characters

The large-sized block active carbon filter removes the impurities such as residual Chlorine, Trihalomethane, Pesticide, the mold particles and makes clean drinking water.

Active BIO make neutral water with abundant hydrogen. (Dissolved Hydrogen concentration max.1mg/L)  
The hydrogen water has superior oxidant reduction action and strong effects to suppress the oxidation decomposition of antioxidation material such as the vitamin C.

The electricity consumption is mere 10W by an clever design.

## Specification

Flow quantity 2L / min at 0.1MPa  
water-purifying performance 1

The large-sized active carbon block filter : 12,000 liter water can be processed  
to remove Trihalomethane, Simazine(Pesticide), 2-Methylisoborneol(the mold smell), dissolved lead.

Input : 100 Volt 0.3A 50-60 Hz

1 water-purifying performance: Evaluated according to a test method of  
JIS(JAPANESE INDUSTRIAL STANDARD) S 3201-2004
